Easy Naturics; Part 1

Today we are explaining
Figure 1 from my book
“Unified Physics”:

Figure 1.
The paradigm idea as a
covering of a background
picture with “puzzle
elements”.

The 20th century paradigm in science

The 21st century paradigm in science

based on the **Unified Physics** (by P. Jakubowski)

Easy Naturics; Part 1

*A scientific paradigm is our temporary vision
of how the Universe is organized
and how it works.*

That vision can be imagined as a background picture of our scientific description of the World.

According to our Old-Paradigm vision, our commonly accepted scientific knowledge has a central core and many peripheral circles of information, like the following picture:

Easy Naturics; Part 1

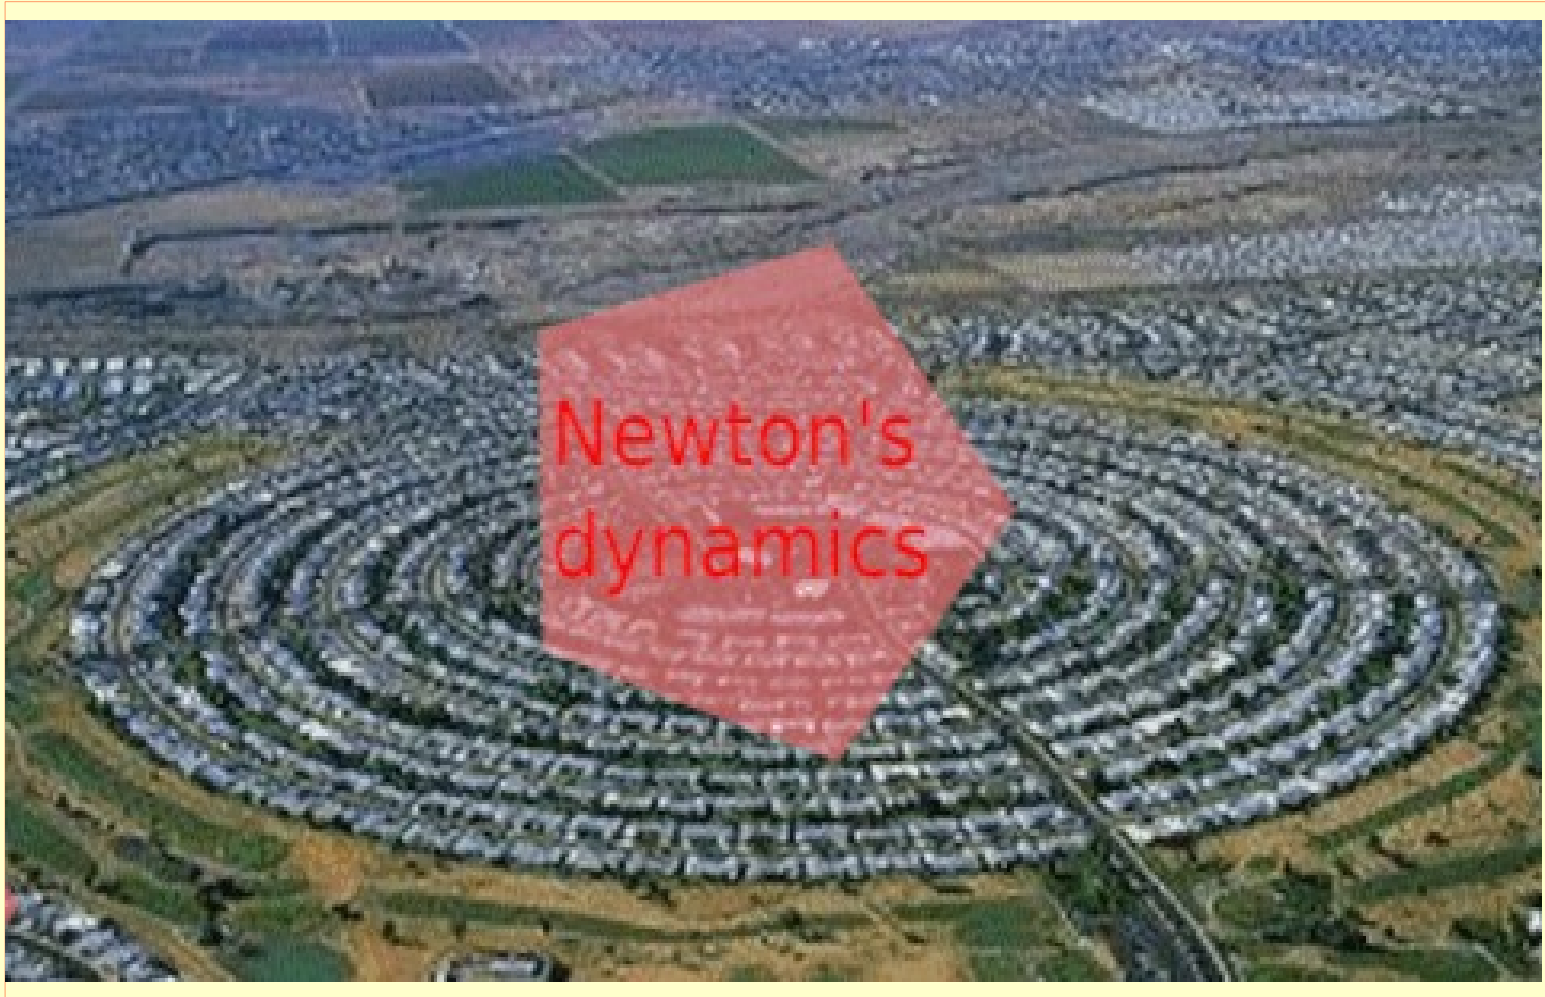

Easy Naturics; Part 1

The old scientific paradigm was originally based on the core vision of the World by English physicist *Isaac Newton*.

His *Dynamics* has formed the center of our modern knowledge in 2nd half of the 17th century.

Easy Naturics; Part 1

Easy Naturics; Part 1

One hundred years later another English physicist, *James Clark Maxwell*, has developed his *Electromagnetic Theory*.

It replaced for three millennia the Newton's *Dynamics* as the central piece of our science at the time.

Easy Naturics; Part 1

Easy Naturics; Part 1

At the beginning of 20th century, a German physicist, Albert Einstein has discovered his famous *Theory of Relativity*.

Nevertheless, it remained only a peripheral knowledge till our times.

Easy Naturics; Part 1

Easy Naturics; Part 1

Also at the beginning of 20th century, many European physicists, (first of all Niels Bohr, Ervin Schrödinger, and Max Planck) have developed the *Quantum Theory of Atoms*.

However, also this fascinating theory remained only a peripheral knowledge about Microcosm.

Easy Naturics; Part 1

Easy Naturics; Part 1

Max Planck, the actual father of the quantized energy idea, has also formulated his *Planck Scale* combining the gravitational constant G , the vacuum-speed of light c_0 , and his own quantum of action (Planck constant h) into some abstract units of length, time, and mass.

Easy Naturics; Part 1

Unfortunately, the values of G , c_0 , and h as used by Planck belong to three *different* states of matter. Thus, the original *Planck Scale cannot have* any practical meaning. It remains a peripheral curiosity of the Old-Paradigm science.

In spite of that absurdity, the unrealistic units of the *Planck Scale* has been used till today in many scientific theories.

Easy Naturics; Part 1

Easy Naturics; Part 1

One of such absurd applications of the *Planck Scale* is the “Big-Bang” idea (actually not a theory at all), which assume the space and time being created at the “Big-Bang” event, but using the Planck's length and time to define the Universe expansion during and immediately after the event itself.

It remained also a peripheral scientific idea.

Easy Naturics; Part 1

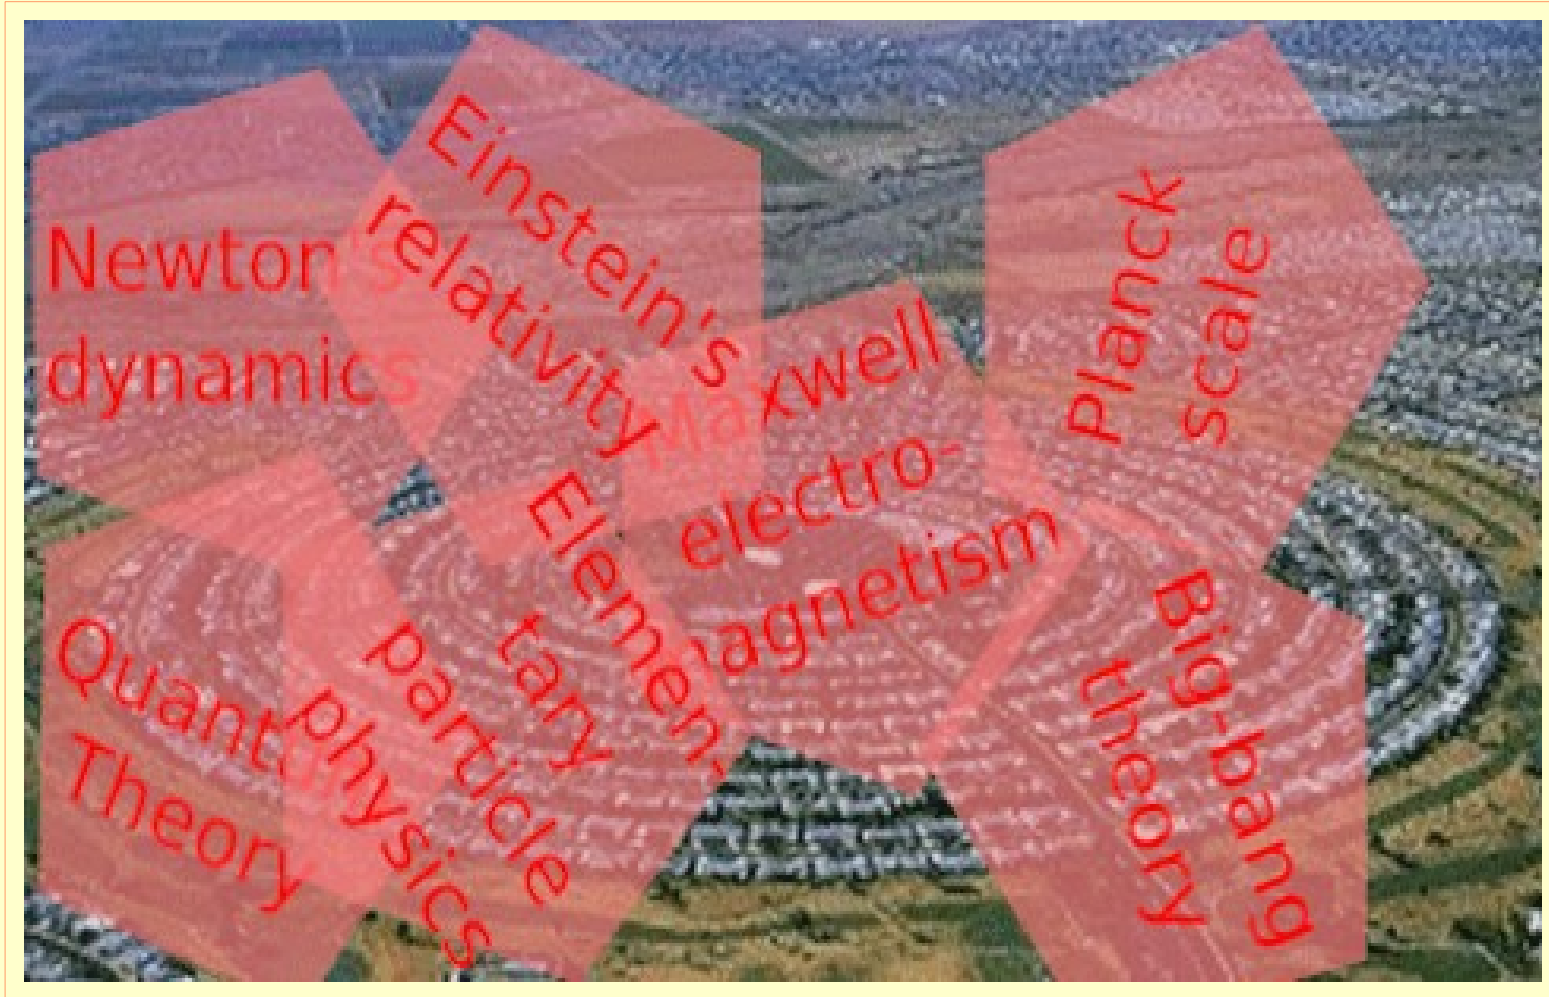

Easy Naturics; Part 1

During the second half of the 20th century, the *Elementary Particle Physics* was the hope carrier of the modern science.

However, after several decades without results, there is clear now, the study direction to smaller and smaller particles was a wrong, peripheral idea too.

Easy Naturics; Part 1

Easy Naturics; Part 1

There are many other disciplines of the 20th-century science based on the *Old Paradigm*, first of all the *Life Sciences*.

However, also none of them is able to unify the split “puzzles” and cover the *Old-Paradigm* vision of our World.

Easy Naturics; Part 1

A new vision of our Universe and our role in it is necessary today. The *New-Paradigm* idea is based on the ancient knowledge that some unifying *Oneness*, a *Universal Unity* has to be positioned at the very core of our knowledge.

And only a quite new form of the “puzzle elements” can be able to cover the new vision picture:

Easy Naturics; Part 1

Easy Naturics; Part 1

The central piece of the *New-Paradigm* vision is the ***Universal Unity***, the ***Oneness***, the ***Universal Creative Potential*** to create everything else.

Easy Naturics; Part 1

Easy Naturics; Part 1

This *Universal Unity* creates its two basic components of our new description of the entire reality.

First of them is the *Unified Family of all physical quantities* we have ever introduced into our science; all being created directly from the *Universal Unity*; all physical quantities are related to each other.

Easy Naturics; Part 1

Easy Naturics; Part 1

The second basic component of the New-Paradigm vision is the *Quantum Spectrum* of all Matter-Spirit Quanta; a “library” of all possible Quanta.

They all are also directly created from the *Universal Unity*. The entire Universe, from atoms to super-clusters of galaxies, is quantized.

Easy Naturics; Part 1

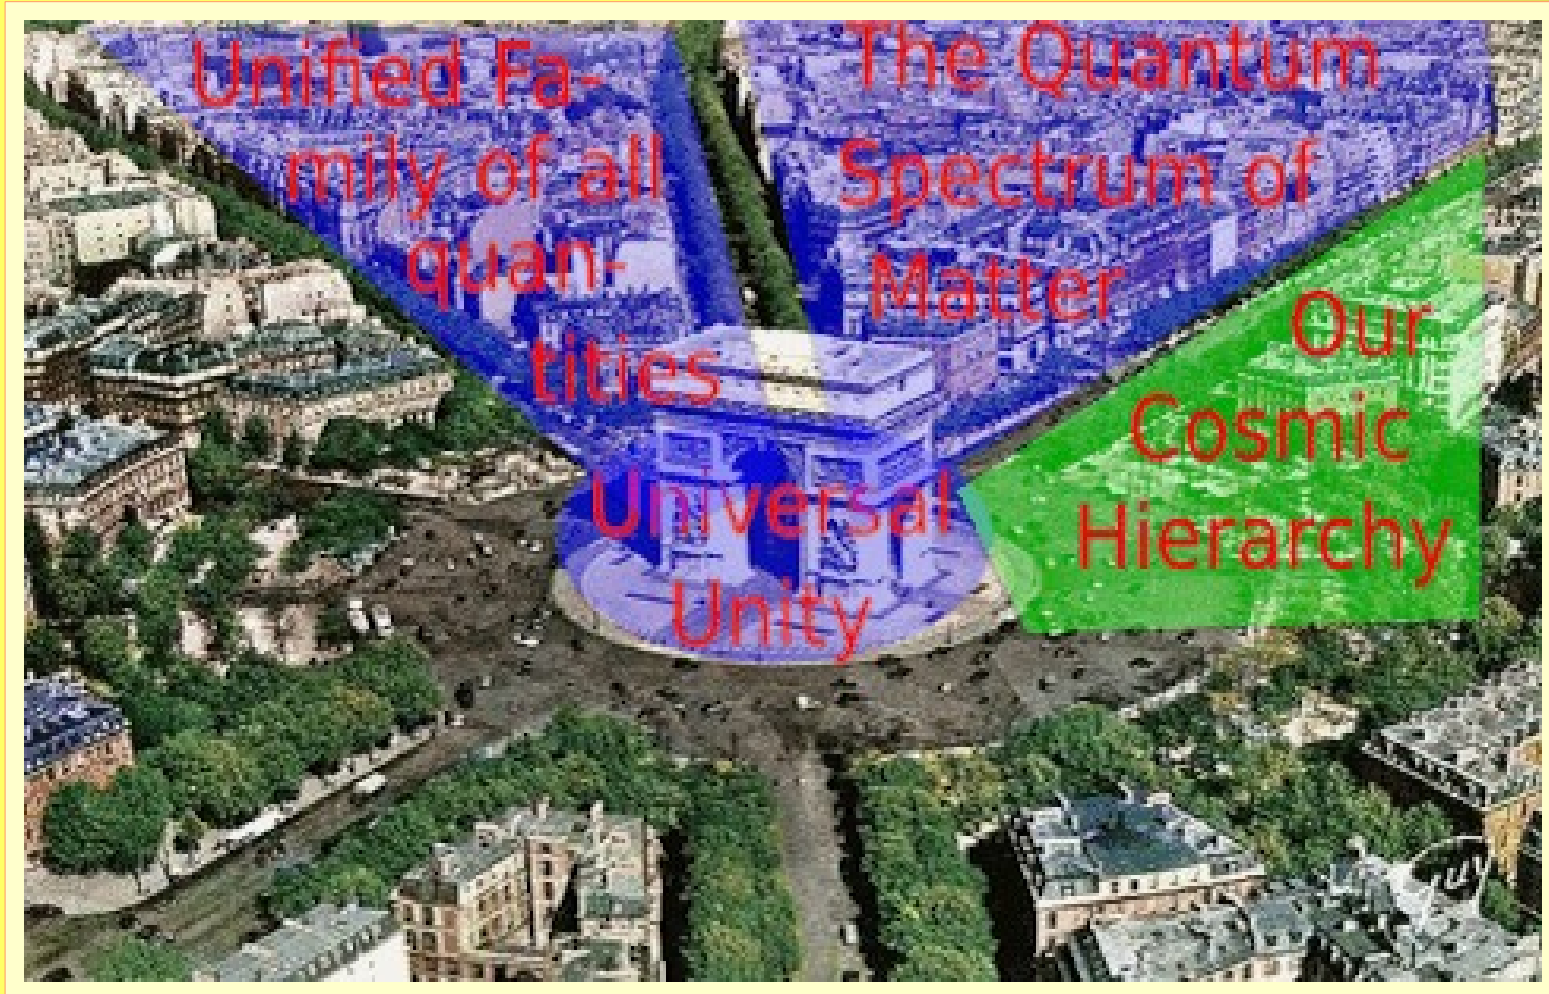

Easy Naturics; Part 1

First important application of the two basic components of the New-Paradigm knowledge to the Universe's structure and organization is the *Cosmic Hierarchy of our Solar System*.

It extends from the Sun to the presently observable boundary of the Universe.

Easy Naturics; Part 1

Easy Naturics; Part 1

The most important result of the Cosmic-Hierarchy application is the new understanding of the origin and the exact beginning of our *First Global Civilization* inhabiting the entire Earth since 1989.

Easy Naturics; Part 1

Easy Naturics; Part 1

The most important aim of the New-Paradigm science is the explanation of the physical nature of our individual and global consciousness as a product of the brains and super-brains of all living as well as all already passed creatures.

Easy Naturics; Part 1

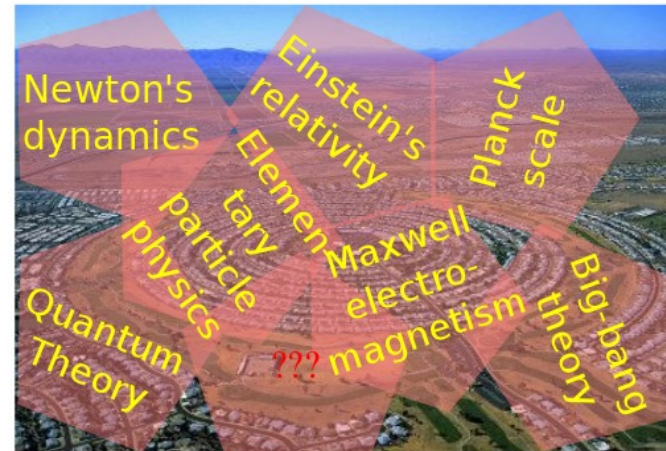

Many other exciting discoveries by means of the *Unified Physics* will surely follow soon.

Easy Naturics; Part 1

That is the meaning of Figure 1 from my book “Unified Physics”.

Let's meet together again to the second part of *Easy Naturics*.
