				25	<b>-0.36</b>

Global-temperature change over the centuries between 63 B.C.E. and 25 C.E.

(In Celsius degrees in relation to the 9-thousand-years average value; Cosmic-Hierarchy jumps of level 5 - the vertical line in red- and of level 3 - in green)

\* Calculated from the Cosmic-Hierarchy relative movements of Large Magellan Cloud (5), Omega Centauri Cluster (4), Orion Complex (3), Ursa Major Moving Group (2), Andrea Star (1), Sun, Saturn, and Jupiter.

\*\* Official climate statistics 1910-2010: 0.48 °C / 10% of the relative energy-transfer-change
