

The Self-Actualizing Cosmos: The Akasha Revolution in Science and Human Consciousness

by Ervin Laszlo

- **Paperback:** 208 pages
- **Publisher:** Inner Traditions; 1 edition (March 2, 2014)
- **Language:** English
- **ISBN-10:** 1620552760
- **ISBN-13:** 978-1620552766

An exploration of the current revolution in scientific thought and the newest scientific findings in support of the Akashic field.

- Explains how the new Akasha paradigm recognizes the interconnection of all things in space and time through the quantum resonance of the Akashic field;
- Reveals the cosmos to be a self-actualizing, self-organizing whole, bringing forth life and consciousness in countless universes;
- Explores the latest discoveries in the sciences of life, mind, and cosmos.

Science evolves through alternating phases of “normal science” and radical shifts that create scientific revolutions. We saw this at the turn of the 20th century, when science shifted from a Newtonian worldview to Einstein’s relativity paradigm, and again with the shift to the quantum paradigm. Now, as we recognize the nonlocal interconnection of all things in space and time, we find our scientific worldview shifting once again.

With contributions by physicists Paul A. LaViolette and Peter Jakubowski, pioneering systems scientist Ervin Laszlo explores the genesis of the current revolution in scientific thought and the latest findings in support of the Akashic field. He explains how the burgeoning Akasha paradigm returns our way of thinking to an integral consciousness, a nonlinear mode of understanding that enables us to accept the reality of nonlocal interconnection throughout the world. This new inclusive way of understanding reaffirms the age-old instinctive comprehension of deep connections among people, societies, and nature, and it integrates and transcends classical religious and scientific paradigms.

Appendix II The Akasha Paradigm in Science: Two Hypotheses

Hypothesis 1: The Transmuting Ether by Paul A. LaViolette

Hypothesis 2: The Universal Quantum Field by Peter Jakubowski
